

## **AirCARE1™ Equipment**

We fly patients with a variety of conditions ranging from basic medical care to advanced critical care. All patients are flown in our proprietary **"In-Flight Emergency Room"** attended by a nurse, paramedic and any other medical specialist as needed. This "In-Flight Emergency Room" is equipped with state of the art equipment, medical storage cabinets and our signature **LifePort Patient Care System**. This customized LifePort system, built to our specifications, include many unique features not commonly seen in the industry.

### ➤ **AeroSled®**

- Pneumatically controlled backrest adjusts from 0-60 degrees
- Four inch high density foam pad and cover \*
- Patient Safety Restraint System
- Adjustable knee lift \*
- Armrest \*
- AeroSled® TS arch with monitor bracket and IV Pole \*

### ➤ **Side Gas Bar \***

- Oxygen outlet
- Compressed air outlet
- Vacuum outlet
- A/C outlets

### ➤ **Patient Loading Utility System \***

- Straight Load Ramp with secondary leveling leg

### ➤ **Medical Storage Cabinets**

\*Surpasses Industry Standards

AirCARE1™ state of the art medical equipment allows the highest level of monitoring capabilities in the industry. Our equipment, procedures, supplies, and medical data are fully integrated into AirCARE1's proprietary patient care system to assure accurate, efficient and reliable enroute medical care. This proprietary combination provides unprecedented peace of mind to both hospital and the patient

➤ **Zoll M Series CCT \***

This state of the art piece of equipment monitors the patient's heart rate, blood pressure, and oxygenation, along with having 12 lead ECG capabilities. This monitor, one of only a few in the industry, is combined with a heart defibrillator

➤ **Impact 754 Eagle Transport Ventilator \***

The best critical care transport ventilator on the market. Completely self contained, the Impact 754 Eagle has an internal blender which is the best ventilator for long range transport.

➤ **Impact 321 High Capacity Suction Unit \***

This portable suction unit is the most powerful unit in the industry.

➤ **Alaris Minimed III Infusion Pump**

The most sophisticated multi-channel transport infusion pump on the market. The Medsystem eliminates the need to carry multiple pumps. Each infusion pump has three channels.

➤ **Triage Meter Plus IStat Monitor \***

The IStat Monitor is a portable laboratory diagnostic tool used in our "In-Flight Emergency Room". This monitor allows our medical team the capability of quickly assessing our patient's needs.

➤ **Additionally, our medical crews are provided with medical reference on PDA's and chart**

on laptop computers, ensuring a seamless flow of medical information.\*

Each piece of equipment is meticulously checked and cleaned before each and every flight

\* Surpasses industry standards
